PERSONAL SKILLS

Teamwork

I participated in a Full-Stack Initiative at Viajanet company, where I was able to present to my co-workers the benefit of using Less in web development and how to use it.

Problem solving

I am attentive to details and have the ability to identify, understand and solve problems in a system, focused mainly on the web interface and compatibility cross-browsers.

Willingness to learn

Working at Mobbitt Systems, I had a challenge of creating a simple application using Ionic, a language that I had no experience, but I had the ability to develop while learning and improving my professional skills.
